ONE OF THE GARDEN SPOTS OF THE WORLD.

Fertile Soil Abundant Water and Other Inducements Offered to Home Seekers.

From N. M. Bureau of Immigration Report. This county is one of the garden spots of the world, and lies on the western slope of the great contipental divide, being part of the Pa citic water-shed. Aside from its great resources as an agricultural and stock valley will be large. courtry its scenery is very beautiful. On all sides great rocky masses, broken into picturesque formations, are to be seen across wide, fertile three rivers 6250 cubic feet of water valleys. The county is watered by per second. At the low estimate of three large rivers, and from their 160 acres to each cubic foot, this is junction below Farmington the view sufficient to irrigate 1,000,000 acres is grand and impressive.

FARM LAND ON THE SAN JUAN. In this valley, from a point about ten miles above Largo, there is a acres available for irrigation. In narrow strip of bottom land on each addition to the value of the water for side of the river. At the town of irrigation, it is a constant source of Largo the river bottom widens out which are available for cultivation. The most important of these tracts are known as the Bioomfield and Solomon mesas, which, with the bottom lands under them, will aggregate somewhat over 20,000 acres. They are on the north side of the river. From thence to the junction of the Animas, the mesa lands are broken is under ditches owned by small assointo detached plateaus rather difficult to irrigate. The Animas and La Plata empty into the San Juan near Farmington. On the two points of land formed by the rivers are about 12,000 or 15,000 acres of fine land all under ditch. Beginning then at the mouth of the La Plata, and for twenty miles down the San Juan, to where it breaks through the Hogback, (a line of low hills) there is a continuous series of mesas with about a mile wide of bottom land A little over 15,000 here are now under ditch. To the north of this are a series of high meadows, or vegas, estimated to contain 44,000 acres. Besides this, and to be properly considered in the San Juan basin, are the lands on either side of the Canon Largo, Canon Blanco and Canon Gallego, These 550 and 600 persons. will include the land along the river and down to the sixth correction line, north; south of this line there are twenty four townships of land, the water facilities of which are only about the average of the and region. They are covered by the headwaters of the Rio Chaco or Chasco and the Amarillo. At present this land is devoted to cattle and sheep raising, but the prospects of using a considpublic land.

the immediate San Juan valley there are about 60,000 acres of land, about 50,000 acres of which are now under town a solid plantation of three or extends back into the bluff on a very ditch. A large area outside of this. on the high mesas, is susceptible of alfalfa fields, grain and meadow is there is an immense mesa stretching irrigation, and will ultimately be seen. Here is at present the densest in that direction. Immediately across

just east of the 108th meridian. It is formed by the junction of two important torrential streams, and will irrigate, if properly handled, 40,000 acres of fruit land. Of this amount under ditch, and it would not be wise to advise large settlement on any new lands, unless some scheme were devised by which the whole amount of the water could be handled by some comprehensive authority. This river flows thirty miles within San Juan county. The farming lands mile to three miles in width and about twanty five miles in length. The Animas has a minimum flow of 2000 cubic feet per second. One of composed of beds of small, round, water-worn boulders of unknown depth. More water flows in this boulder bed than on the surface. Along in the river valley proper there are about 18,000 acres of good land, the most important area of which is from Azire to below Flora Vista.

FARMINGTON GLADE.

there is an important area of land included in the Farmington Glade, population of the three is about 600 by fire, but will be rebuilt this summer. an introvale between the Animas and persons. THE LA PLATA VALLEY.

The La Plata river flows in a deep. sandy bed, and its waters generally disappear in the last week in August the upper part of this river after it enters San Juan county there are about 8000 acres cultivated; and at Jackson, near its mid-course, there is a small Mormon colony who till about 1000 acres. The river has an average fall of forty feet to the mile, is about thirty feet wide and has a mean average flow of about 250 cubic feet per second. The ultimate reclamation of lands in the La Plata

ACTUAL WATER RESOURCES. It will be seen from the foregoing that there are available from these of land. According to a county pamphlet issued for circulation at the World's fair, there are 175,000 affected by the most enduring drouth. The wasted power of their waters would furnish heat, light and electrical motive force far in excess of any possible need of this county. At present the only use made of all this wealth of water is to irrigate about 25,000 acres, the larger part of which ciations of farmers.

The modern civilization has followed the same lines of settlement as corn, 25 to 50 bushels. A ready sale did the ancient. Aztec is the county is found at good prices. Current seat, situated on the southeast bank prices for 1893 were as follows: of the Animas. It has a bank, several Wheat, per cwt. \$1.40; oats. \$1.50; large stores, hotel and livery and parley, \$1.40; corn, \$1.50; bran, p-r stage stables. The county jail is a ton, \$18 Vegetables of every variety well built, steel lined adobe structure | flourish, from the harder varieties, The surrounding country is well such as Irish potatoes, turnips and cutivated, the farms extending up beets, to the more tender melous eggand down the river for several miles | plants, tomathes, etc. At this point the valley is about two miles wide. Fruit, alfalfa, grain. Is, however, the staple crop in the potatoes and all the root crops give county; drouth is not to be feareabundant harvests. Apples and tomatoes seem peculiarly adapted to the soil. The population of the town and surrounding country is between
